# BRING YOUR G8ME

World Handicap System (WHS)  
Coming into play **2<sup>nd</sup> November 2020**

## Handicap Index

Golfers in England will now have a Handicap Index, calculated from the best eight rounds from their last 20 scores. A Handicap Index is portable on any course around the world and will promote inclusivity within the game.

To find out more on the WHS visit:

## HANDICAP INDEX

### What is handicap Index?

Golfers will consider the Handicap Index to be the most important element of the WHS.

The Handicap Index will:

- Measure the ability of a player
- Be portable from course to course
- Allow players to compete fairly and therefore promote inclusivity within the game

### A Handicap Index is calculated from the best eight scores from the last 20 rounds.

As a new score is submitted, a player's Handicap Index will automatically update to the most recent 20 scores. A player's Handicap Index will update promptly overnight after the submission of an acceptable score and be ready before the next time they play.

**Please see example on the next page.**

### How to obtain a Handicap Index?

When the new system comes into play most golfers can have a Handicap Index generated, based on their existing records.

For new golfers to gain their Handicap Index they will have to submit a minimum of 54 holes (using any combination of 9 and 18 holes). Their Handicap Index will be the lowest of their three rounds minus two strokes and continue to be built until the 20 scores are achieved.

A player's Handicap Index is calculated as a rolling average of the lowest 8 from the last 20 Score Differentials (highlighted yellow in the picture)

### Example of 8 of 20 Calculation

Score No.	Date Played	Course	Course Rating	Slope Rating	Adjusted Gross Score	Score Differential
1	22/9/20	Hill GC	70.5	125	91	18.5
2	5/9/20	Hill GC	70.5	125	92	19.4
3	1/9/20	Hill GC	70.5	125	99	25.8
4	28/8/20	Hill GC	70.5	125	89	16.7
5	23/8/20	River GC	71.3	127	92	18.4
6	26/7/20	Meadow GC	72.2	131	87	12.8
7	14/7/20	Hill GC	70.5	125	97	24.0
8	4/7/20	Hill GC	70.5	125	88	15.8
9	19/6/20	River GC	71.3	127	87	13.5
10	16/6/20	Valley GC	69.9	118	95	24.0
11	12/6/20	Forest GC	70.1	115	86	15.6
12	5/6/20	Meadow GC	72.2	131	85	11.0
13	2/6/20	Hill GC	70.5	125	82	10.4
14	30/5/20	Hill GC	70.5	125	94	21.2
15	25/5/20	Valley GC	69.9	118	89	18.3
16	22/5/20	Hill GC	70.5	125	97	24.0
17	29/4/20	Hill GC	70.5	125	85	13.1
18	14/4/20	Hill GC	70.5	125	93	20.3
19	10/4/20	Hill GC	70.5	125	94	21.2
20	3/4/20	Meadow GC	72.2	131	86	12.1

• Adding together the best 8 differentials out of the last 20:

- + 12.8
- + 15.8
- + 13.5
- + 15.6
- + 11.0
- + 10.4
- + 13.1
- + 12.1

And averaging the total: = 104.3 / 8

**Handicap Index of 13.0**

Each time a new score is submitted the average of the lowest 8 from the last 20 is re-calculated overnight, which may or may not lead to a change of Handicap Index.

A new score is submitted at the top of the list and the oldest score drops off the bottom. Each time a new score is added the Handicap Index is re-calculated, but the index will only be revised if there is a change to the best 8 scores. For example, if the player above returns a new Differential of 14.5, that replaces the 12.1 that has dropped out of the last 20. The effect of this is to increase the Handicap Index from 13.0 to 13.3

### Example of 8 of 20 Calculation

Score No.	Date Played	Course	Course Rating	Slope Rating	Adjusted Gross Score	Score Differential
1	25/9/20	Meadow GC	72.2	131	89	14.5
2	22/9/20	Hill GC	70.5	125	91	18.5
3	5/9/20	Hill GC	70.5	125	92	19.4
4	1/9/20	Hill GC	70.5	125	99	25.8
5	28/8/20	Hill GC	70.5	125	89	16.7
6	23/8/20	River GC	71.3	127	92	18.4
7	26/7/20	Meadow GC	72.2	131	87	12.8
8	14/7/20	Hill GC	70.5	125	97	24.0
9	4/7/20	Hill GC	70.5	125	88	15.8
10	19/6/20	River GC	71.3	127	87	13.5
11	16/6/20	Valley GC	69.9	118	95	24.0
12	12/6/20	Forest GC	70.1	115	86	15.6
13	5/6/20	Meadow GC	72.2	131	85	11.0
14	2/6/20	Hill GC	70.5	125	82	10.4
15	30/5/20	Hill GC	70.5	125	94	21.2
16	25/5/20	Valley GC	69.9	118	89	18.3
17	22/5/20	Hill GC	70.5	125	97	24.0
18	29/4/20	Hill GC	70.5	125	85	13.1
19	14/4/20	Hill GC	70.5	125	93	20.3
20	10/4/20	Hill GC	70.5	125	94	21.2
21	3/4/20	Meadow GC	72.2	131	86	12.1

• Adding together the best 8 differentials out of the last 20:

- + 14.5
- + 12.8
- + 15.8
- + 13.5
- + 15.6
- + 11.0
- + 10.4
- + 13.1

And averaging the total: = 106.7 / 8

**Handicap Index of 13.3**

You can get an indication of any potential Handicap Index change by subtracting a displaced best 8 Differential from the new Differential and dividing by 8. In the case above  $14.5 - 12.1 = 2.4$ .  $2.4 / 8 = 0.3$
